

HUSH-SLAB Sound Absorber

General

For Hush-Slab 100, Hush-Slab 75, Hush-Slab 50 & Hush-Slab 25

Should you have any technical questions prior to or during installation, please call 0151 933 2026 for friendly and straightforward advice.

Fitting the Slab

Cut the Hush-Slabs to the required void width using a sharp saw or long blade, and starting at one of the room perimeters, begin fitting the slabs inbetween the floor joists or wall studs.

At the end of each run, cut the last slab to the required length and then continue the process until all voids are filled, ensuring there are no gaps.

Any excess trimmings can be used to pack in alongside the full slabs, avoiding any waste.

Hush-Slabs can be friction fitted from below when used within a ceiling system.

Technical Advice

For advice on the specification or use of Hush-Slab within any project, please contact our experienced technical team on **0151 933 2026** who will be happy to give comprehensive and practical advice to meet with your requirements.
